CONTENTS

VOLUME 104 · NUMBER 1 · JULY 1994

1 REINALDO MARÍN and JOSEPH F. HOFFMAN. Phosphate from the phosphointermediate (EP) of the human red blood cell Na/K pump is coeffluxed with Na in the absence of external K

33 REINALDO MARÍN and JOSEPH F. HOFFMAN. ADP + orthophosphate (P_i) stimulates an Na/K pump-mediated coefflux of P_i and Na in human red blood cell ghosts

57 HONG ZHAO, ROBERT A. STAR, and SHMUEL MUALLEM. Membrane localization of H^+ and HCO_3^- transporters in the rat pancreatic duct

87 J. CUI, R. P. KLINE, P. PENNEFATHER, and I. S. COHEN. Gating of I_{sK} expressed in *Xenopus* oocytes depends on the amount of mRNA injected

107 CHRIS MATHES and STUART H. THOMPSON. Calcium current activated by muscarinic receptors and thapsigargin in neuronal cells

123 CHARLES J. VENGLARIK, BRUCE D. SCHULTZ, RAYMOND A. FRIZZELL, and ROBERT J. BRIDGES. ATP alters current fluctuations of cystic fibrosis transmembrane conductance regulator: evidence for a three-state activation mechanism

147 SHIN-ICHI KOUMI, RYOICHI SATO, TATSUYUKI HORIKAWA, TAKUMI ARAMAKI, and HIDEMASA OKUMURA. Characterization of the calcium-sensitive voltage–gated delayed rectifier potassium channel in isolated guinea-pig hepatocytes

173 DOROTHEA Y. SANCHEZ and ANDREW L. BLATZ. Block of neuronal fast chloride channels by internal tetraethylammonium ions

VOLUME 104 · NUMBER 2 · AUGUST 1994

197 STEPHEN HEYSE, INGO WUDDEL, HANS-JÜRGAN APELL, and WERNER STÜRMER. Partial reactions of the Na,K-ATPase: determination of rate constants

241 SERGEY V. SMIRNOV and PHILIP I. AARONSON. Alteration of the transmembrane K^+ gradient during development of delayed rectifier in isolated rat pulmonary arterial cells

265 MASATOSHI MASUO, SHEILA REARDON, MITSUO IKEBE, and TOSHIO KITAZAWA. A novel mechanism for the Ca^{2+}-sensitizing effect of protein kinase C on vascular smooth muscle: inhibition of myosin light chain phosphatase

287 STEPHAN ROHR and B. M. SALZBERG. Characterization of impulse propagation at the microscopic level across geometrically defined expansions of excitable tissue: multiple site optical recording of transmembrane voltage (MSORTV) in patterned growth of heart cell cultures

311 DANIEL H. COX and KATHLEEN DUNLAP. Inactivation of N-type calcium current in chick sensory neurons: calcium and voltage dependence

337 JANET E. ZENGEL, MARIA A. SOSA, ROBERT E. POAGE, and DENNIS R. MOSIER. Role of intracellular Ca^{2+} in stimulation-induced increases in transmitter release at the frog neuromuscular junction

357 SHIN-ICHI KOUMI, RYOICHI SATO, and TAKUMI ARAMAKI. Characterization of calcium-activated chloride channel in isolated guinea-pig hepatocytes

375 AUGUSTIN GUERRERO, FREDERIC S. FAY, and JOSHUA J. SINGER. Caffeine activates a Ca^{2+}-permeable nonselective cation channel in smooth muscle cells

395 AUGUSTIN GUERRERO, JOSHUA J. SINGER, and FREDERIC S. FAY. Simultaneous measurement of Ca^{2+} release and influx into smooth muscle cells in response to caffeine

VOLUME 104 · NUMBER 3 · SEPTEMBER 1994

425 ALAN R. G. LINDSAY, ANDREW TINKER, and ALAN J. WILLIAMS. How does ryanodine modify ion handling in the sheep cardiac sarcoplasmic reticulum Ca^{2+}-release channel?

449 NATALIA SHIROKOVA, GONZALO PIZARRO, and EDUARDO RÍOS. A damped oscillation in the intramembraneous charge movement and calcium release flux of frog skeletal mucle fibers

477 ZHE LU and RODERICK MACKINNON. A conductance maximum observed in an inward-rectifier potassium channel

487 MARIA DEL PILAR GOMEZ and ENRICO NASI. Blockage of light-sensitive conductance in hyperpolarizing photoreceptors of the scallop. Effects of tetraethylammonium and 4-aminopyrridine

507 MICHAEL E. O'LEARY and RICHARD HORN. Internal block of human heart sodium channels by symmetrical tetra-alkylammoniums

523 MICHAEL E. O'LEARY, ROLAND G. KALLEN, and RICHARD HORN. Evidence for a direct interaction between internal tetra-alkyammonium cations and the inactivation gate of cardiac sodium channels

541 HORST FISCHER and TERRY E. MACHEN. CFTR displays voltage dependence and two gating modes during stimulation

567 Isabel D. Cadenas, Eric S. Reifsnider, and Daniel Tranchina. Modulation of synaptic transfer between retinal cones and horizontal cells by spatial contrast

593 M. Juusola, E. Kouvalainen, M. Järvilehto, and M. Weckström. Contrast gain, signal-to-noise ratio, and linearity in light-adapted blowfly photoreceptors

VOLUME 104 · NUMBER 4 · OCTOBER 1994

625 Sen Ji, Weijing Sun, Alfred L. George, Jr., Richard Horn, and Robert Barchi. Voltage-dependent regulation of modal gating in the rat SkM1 sodium channel expressed in *Xenopus* oocytes

645 Jens A. Lundbæk and Olaf S. Andersen. Lysophospholipids modulate channel function by altering the mechanical properties of lipid bilayers

675 Sherrill Spires and Ted Begenisich. Modulation of potassium channel gating by external divalent cations

693 Lawrence G. Palmer, Lida Antonian, and Gustavo Frindt. Regulation of apical K and Na channels and Na/K pumps in rat cortical collecting tubule by dietary K

711 Fabio Franciolini and Wolfgang Nonner. Anion-cation interactions in the pore of neuronal background chloride channels

725 Fabio Franciolini and Wolfgang Nonner. A multi-ion permeation in neuronal background chloride channels

747 Michael J. Callahan and Stephen J. Korn. Permeation of Na^+ through a delayed rectifier K^+ channel in chick dorsal root ganglion neurons

773 Nicholas Deutsch, Satoshi Matsuoka, and James N. Weiss. Surface charge and properties of cardiac ATP-sensitive K^+ channels

VOLUME 104 · NUMBER 5 · NOVEMBER 1994

801 K. Benndorf. Properties of single cardiac Na channels at 35°C

821 Ilya Bezprozvanny and Barbara E. Erlich. Inositol (1,4,5)-triphosphate ($INSP_3$)-gated Ca channels from cerebellum: conduction properties for divalent cations and regulation by intraluminal calcium

857 Atticus H. Hainsworth, Richard A. Levis, and Robert S. Eisenberg. Origins of open-channel noise in the large potassium channel of sarcoplasmic reticulum

885 QING YE, GERARD L. HECK, and JOHN A. DESIMONE. Effects of voltage perturbation of the lingual receptive field on chorda tympani responses to Na^+ and K^+ salts in the rat: implications for gustatory transduction

909 JAMES L. MILLER and JUAN KORENBROT. Differences in calcium homeostasis between retinal rod and cone photoreceptors revealed by the effects of voltage on the cGMP-gated conductance of intact cells

941 YONGXIN LI, REMY HANF, ANGELA S. OTERO, RODOLPHE FISCHMEISTER, and GABOR SZABO. Differential effects of pertussis toxin on the muscarinic regulation of Ca^{2+} and K^+ in frog cardiac myocytes

961 JEFFREY C. FREEDMAN, TERRI S. NOVAK, JOHN D. BISOGNANO, and PROMOD R. PRETAP. Voltage dependence of DIDS-insensitive chloride conductance in human red blood cells treated with valinomycin or gramicidin

985 BRETT A. ADAMS, YASUO MORI, MAN-SUK KIM, TSUTOMU TANABE, and KURT G. BEAM. Heterologous expression of BI Ca^{2+} channels in dysgenic skeletal muscle

VOLUME 104 · NUMBER 6 · DECEMBER 1994

997 JAMIE I. VANDENBERG, ATSUYA YOSHIDA, KIARAN KIRK, and TREVOR POWELL. Swelling-activated and isoprenaline-activated chloride currents in guinea pig cardiac myocytes have distinct electrophysiology and pharmacology

1019 ULISES MEZA, GUILLERMO AVILA, RICARDO FELIX, JUAN CARLOS GOMORA, and GABRIEL COTA. Long-term regulation of calcium channels in clonal pituitary cells by epidermal growth factor, insulin, and glucocorticoids

1039 ROBERT PAUL MALCHOW, HAOHUA QIAN, and HARRIS RIPPS. A novel action of quinine and quinidine on the membrane conductance of neurons from the vertebrate retina

1057 ASHER PERETZ, CLAUS SANDLER, KUNO KIRSCHFELD, ROGER C. HARDIE, and BARUCH MINKE. Genetic dissection of light-induced Ca^{2+} influx into *Drosophila* photoreceptors

1079 YOSHIYUKI TSUURA, HOSHI ISHIDA, SEIJI HAYASHI, KIMIHIKO SAKAMOTO, MINORU HORIE, and YUTAKA SEINO. Nitric oxide opens ATP-sensitive K^+ channels through suppression of phosphofructokinase activity and inhibits glucose-induced insulin release in pancreatic β cells

1099 JÜRGEN DIETRICH and MANFRED LINDAU. Chloride channels in mast cells: block by DIDS and role in exocytosis

1113 JESÚS GARCÍA and KURT G. BEAM. Calcium transients associated with the T type calcium current in myotubes

1129 GEORGE R. EHRING, YURI V. OPSICHUK, and MICHAEL D. CALAHAN. Swelling-activated chloride channels in multidrug-sensitive and -resistant cells

1163 AUTHOR INDEX TO VOLUME 104

1*a*–60*a* ABSTRACTS OF PAPERS PRESENTED AT THE FORTY-EIGHTH ANNUAL MEETING OF THE SOCIETY OF GENERAL PHYSIOLOGISTS
